Job Title: Senior Backend Engineer

Job Description:

We are looking for a Senior Backend Engineer to join our core infrastructure team.

The ideal candidate has strong experience with Python, Django, and Cloud technologies.

Requirements:

- 5+ years of experience in backend development.

- Strong proficiency in Python and Django/Flask.

- Experience with cloud platforms, specifically AWS.

- Hands-on experience with Docker and Kubernetes for containerization.

- Solid understanding of databases like PostgreSQL and Redis.

- Bachelor's in Computer Science or related field.

Responsibilities:

- Design and develop REST APIs.

- Manage deployments using CI/CD pipelines.

- Collaborate with the frontend team.

Tech Stack:

- Python, Django, AWS, Docker, Kubernetes, PostgreSQL
